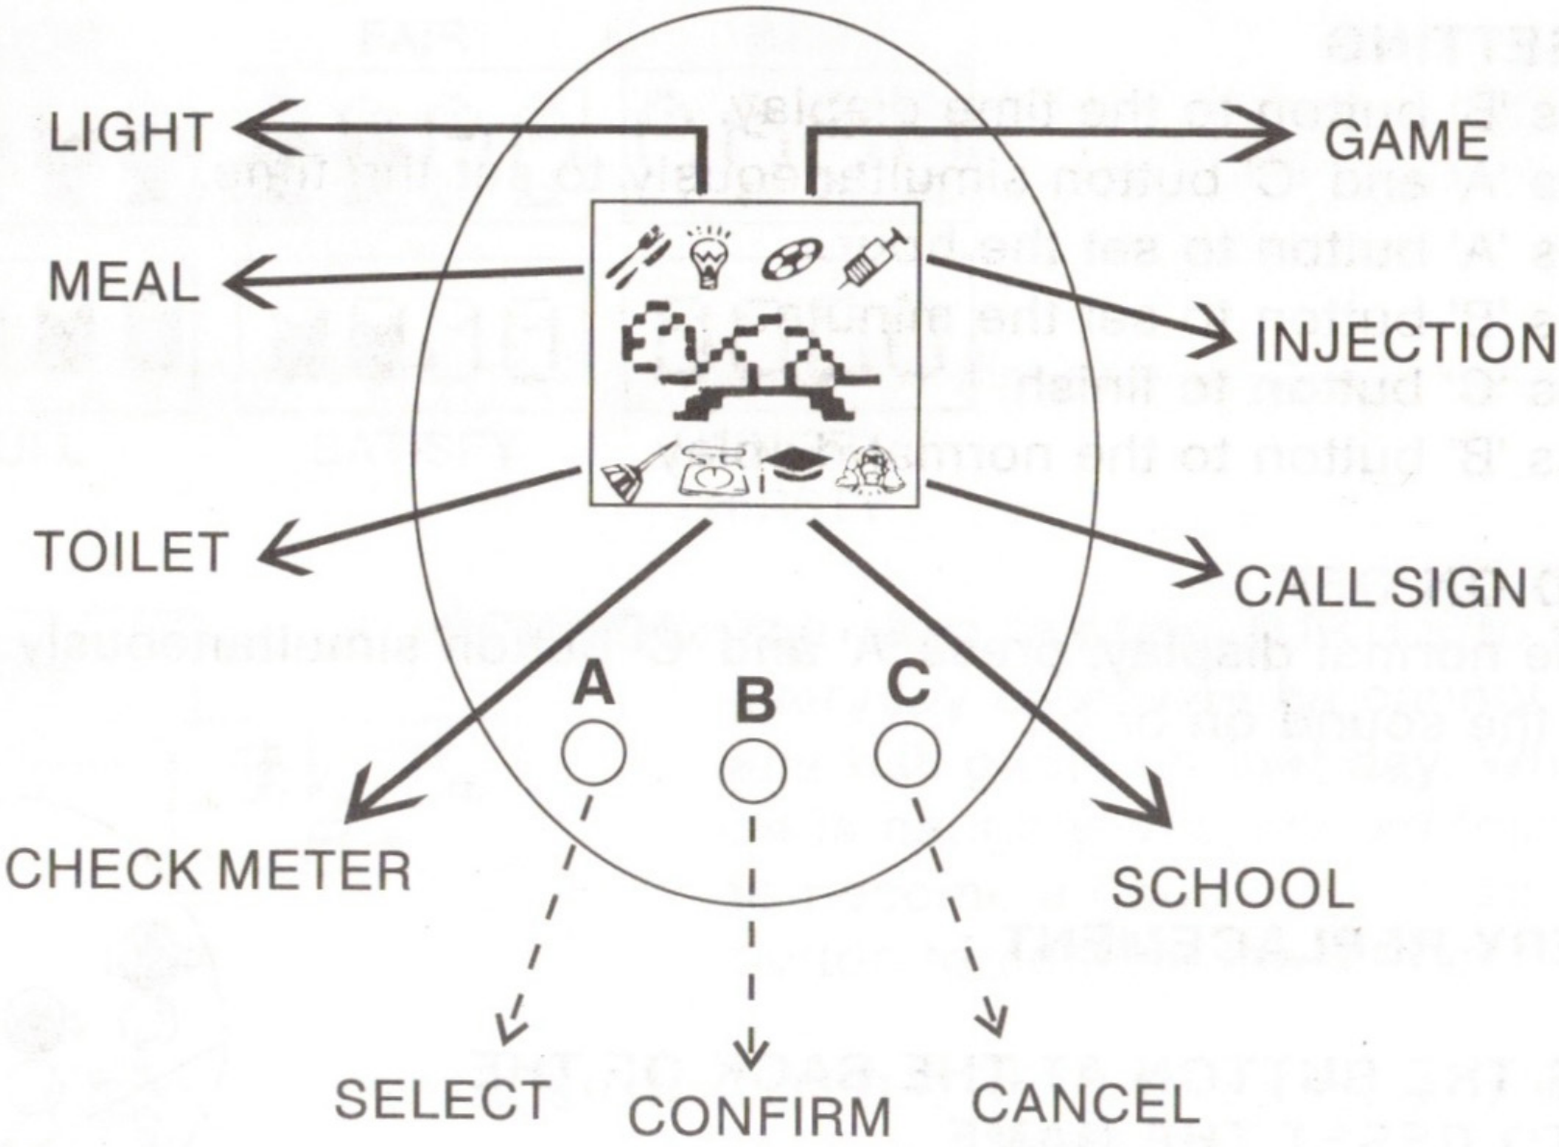
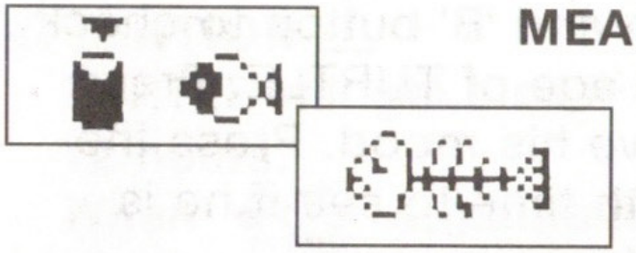
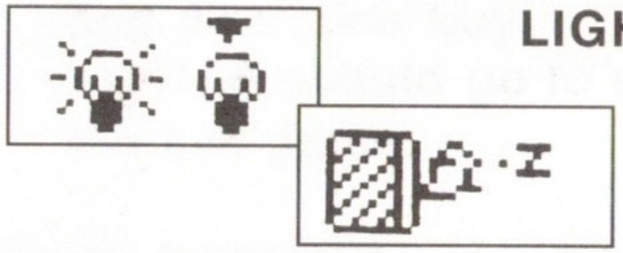
ELECTRONIC POCKET TURTLE is a digital super–interactive pet. It is a real great fun to observe his growing process from a baby turtle to a young turtle and then to an adult turtle. TURTLE will call "pi,pi" when he is sick, hungry or in bad mood, ... You should take care of him with love, patience and teach him to become a good boy. Lack of care will cause him to die. TURTLE will be ready to born in 5 minutes.

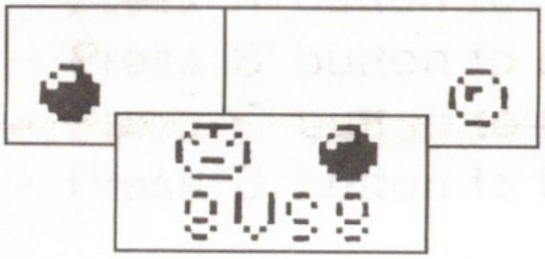




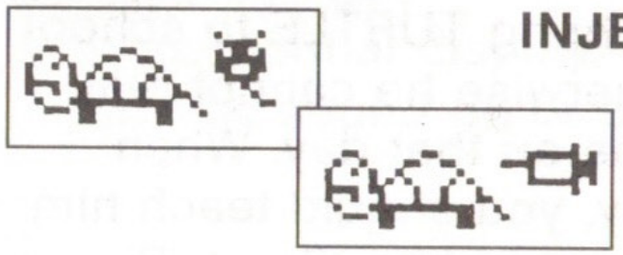
MEAL: Press 'A' button to select "water" or "fish". Press 'B' button to confirm your selection.



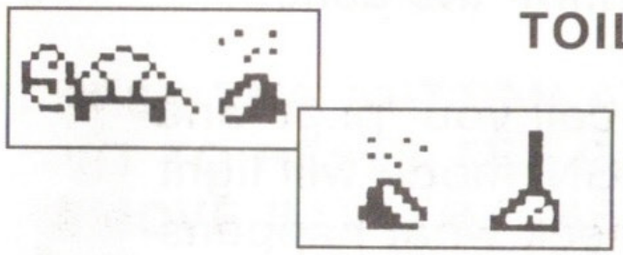
LIGHT: Press 'A' button to turn on ( ) or ( ) the light. Press 'B' button to confirm your selection. While TURTLE is sleeping, please turn off the light.



GAME: Press 'A' button to select the left ball or 'B' button to select the right ball. TURTLE will win one game if he can guess correctly the direction of the ball. There are 5 games in one round.



INJECTION: When the bacteria symbol ( ) appears, you must give TURTLE injection. Press 'B' button to inject. Two times injection will cure the disease.



TOILET: When you see the stool symbol ( ) appears, you need to take TURTLE to toilet, or else he will get sick. Press 'B' button to confirm your action.

CHECK METER: Press 'A' button and 'B' button to check the weight and age of TURTLE. Press again to observe his mood. Press the 3rd time and 4th time to see if he is hungry or thirsty.
